Profile Summary

Highly analytical Computer Engineering graduate from Universitas Indonesia with a comprehensive technical foundation in Data Science, IT Security, Web Programming, and Computer Networks. Proven track record in optimizing enterprise-scale operational pipelines and SQL databases during an internship at PT Adaro Logistics. Possesses a Project Management Certified Practitioner (PMCP) credential, demonstrating strong capabilities in cross-functional collaboration and task execution. Backed by global credentials from Oracle, Google, and Cisco, I am equipped with structured problem-solving skills and a strong research mindset, making me a highly qualified candidate ready to drive technological innovations in dynamic enterprise environments.

Education

Universitas Indonesia *Depok, Indonesia*
Bachelor of Engineering in Computer Engineering *Aug 2022 – Jul 2026*
Cumulative GPA: 3.46 / 4.00

Professional Experience

PT ADARO LOGISTICS *Remote*
Software Engineer (Intern) *Jul 2025 – Oct 2025*

- Developed and optimized enterprise logistics web applications utilizing modern programming languages (including PHP and JavaScript) and relational databases (SQL).
- Streamlined backend data pipelines and database queries, significantly reducing system load times and ensuring real-time data accuracy for high-scale daily operations.
- Conducted extensive system monitoring and integrated UI/backend troubleshooting, effectively identifying root causes of anomalies to maintain operational reliability.

Academic & Research Projects

Federated Learning-Based Intrusion Detection System *Undergraduate Thesis*

- Evaluated and benchmarked multiple existing Machine Learning algorithms on the massive CIC-IDS2017 dataset, conducting in-depth comparative analysis to extract the architectural strengths of the top three performing models.
- Synthesized these analytical insights to design and propose a novel, privacy-preserving Intrusion Detection System (IDS) utilizing Federated Learning, successfully identifying network threats with an 87.96% accuracy rate without centralizing sensitive payload data.

Licenses & Professional Certifications

Computer Architecture, Network & IT Security

- **Cisco CCNA Series (Introduction to Networks, Switching, Enterprise)** – *Cisco (Jul 2024)*
- **Cybersecurity Specializations (Google Cloud, Microsoft, IBM, Cisco)** – *(Nov 2025)*

Data Science & Database Management

- **Oracle Cloud Infrastructure 2025 Certified Data Science & Gen AI Pro** – *Oracle (Oct 2025)*
- **Machine Learning with Python** – *Cognitive Class / IBM (Mar 2025)*

IT Project Management

- **Project Management Certified Practitioner (PMCP)** – *PT Sinergi Daya Mitra (May 2026)*

Skills & Competencies

- **Web Programming & Database:** PHP, SQL (MySQL/PostgreSQL), JavaScript/TypeScript, Python.
- **IT Security & Network:** Cisco Networking Protocols, Threat Analysis, Privacy-Preserving Architecture.
- **Project Management & Soft Skills:** IT Project Lifecycle, Analytical Thinking, Cross-functional Collaboration.
